

Google Distributed Cloud Datasheets

Key benefits and technical features of Google Distributed Cloud products

[Click on datasheets in the table below to access specs](#)

Google Distributed Cloud Datasheets				
GDC air-gapped appliance	 Storage services product datasheet Google Distributed Cloud air-gapped appliance Overview The Google Distributed Cloud (GDC) air-gapped appliance is a rugged, industrial-grade server designed for environments where network connectivity is limited or unavailable. It provides secure, offline storage and processing capabilities for Google Cloud services. Storage Datasheet			
	 Platform datasheet Google Distributed Cloud air-gapped Racks Overview The Google Distributed Cloud (GDC) air-gapped racks are designed for environments where network connectivity is limited or unavailable. They provide secure, offline storage and processing capabilities for Google Cloud services. Platform Datasheet	 IaaS datasheet Google Distributed Cloud air-gapped racks As a glance The Google Distributed Cloud (GDC) air-gapped racks are designed for environments where network connectivity is limited or unavailable. They provide secure, offline storage and processing capabilities for Google Cloud services. IaaS Datasheet	 PaaS datasheet Google Distributed Cloud air-gapped racks As a glance The Google Distributed Cloud (GDC) air-gapped racks are designed for environments where network connectivity is limited or unavailable. They provide secure, offline storage and processing capabilities for Google Cloud services. PaaS Datasheet	 Storage services product datasheet Google Distributed Cloud air-gapped racks Overview The Google Distributed Cloud (GDC) air-gapped racks are designed for environments where network connectivity is limited or unavailable. They provide secure, offline storage and processing capabilities for Google Cloud services. Storage Datasheet
